

# GSM - CallFree2

## Gate Automation Equipment

TD2 Cloning Remote

Ghost 200

6RR

DK918s

D5731

**The GSM -CallFree2** is a GSM remote control switch that is activated by calling its mobile phone number. No call costs are incurred as it rejects the call without answering and switches on the device connected to it. CallFree2 can also be connected to PIR's, burglar alarms, water level or leakage sensors, Carbon Monoxide detectors, etc. and will send a text when an alarm condition is triggered.

Industrial Doors

Gates & Doors

Central Heating

### Technical Specification

Rated Voltage:	12VDC 1 A
Working temperature:	-10~+60C
Storage temperature:	-20~+60C
Relative humidity:	10-90%, No condensation
Work frequency:	900/1800MHZ
